

# INVESTIGATING E-CRIME & SOCIAL NETWORKING SITES

*All public authorities have struggled with the use of the Internet for investigations, particularly social network sites. OSC Annual Report*

This workshop uses case studies to inform the delegates about internet investigations and research. Research methods and evidence gathering techniques are explained. Investigators, regulators, corporate investigation teams, HR personnel, researchers and many others use the internet and social networking sites as an investigative tool. Research of social networking sites such as LinkedIn, Facebook, Twitter, and many others is thoroughly examined. The impact of relevant legislation, guidance, and best practice is identified and explained to ensure such activity is conducted in a lawful and effective manner.

## **COST**

**£299 + vat** (Lunch and refreshments included)

## **OUR SPEAKER**

Steve Morris was formerly a detective with the West Midlands Police Force. Steve delivers RIPA and RIPSAs training to law enforcement and other regulatory authorities. Steve specialises in communications data and internet research training. He has extensive experience of use of overt and covert internet research methods.

*"A real eye opener on how social networking sites can be used effectively in an investigation"*

**DG, Wiltshire Fire and Rescue**

*"Useful to know how much info is actually potentially available on the internet. Also useful to know about considering privacy even when using open sources."*

**LC, City of Westminster Council**

*"Easy to follow. Highly recommended"*

**MD, Carlisle City Council**

## **VENUES, DATES AND BOOKING**
